Project Ireland 2040 provides for a €11.9 billion investment in the education and training sector over the period 2018 to 2027. The 2020 capital allocation for the Education Department is €922m which represents a €19m (2%) cut in capital budget which is the first school buildings funding cut in seven years.

Acknowledging this year's cut, Minister for Education Joe McHugh said that an "understanding" had been reached with the Department of Public Expenditure to shift funding from capital to current spending in order to protect "frontline services".

Last year's Budget saw capital funding for education increased by 26%, the year before that by 7%, and by 16% the year before that again.

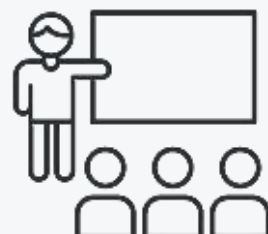

The Minister said this year's reduction would not in any way affect school building plans for next year. He said his department still intends to create 30,000 student places, and that new buildings would continue to come on stream. The department says that €670m of the overall capital allocation will be spent on school buildings next year, compared to €672m last year.

Investing in schools

The schools 2020 allocation will support circa 60 new projects going to construction in 2020 ranging in value from €1m to projects with a value in excess of €20m delivering in excess of 30,000 school places (permanent additional and replacement places). This is in addition to in excess of 40 existing projects ranging in value from €1m to projects with a value in excess of €20m which are currently in construction and being progressed through 2020 delivering up to 25,000 school places (permanent additional and replacement places).

The capital allocation will also facilitate the delivery of smaller scale projects, acquisition of sites under the site acquisition programme and works necessary for those schools included in the School Remediation Programme.

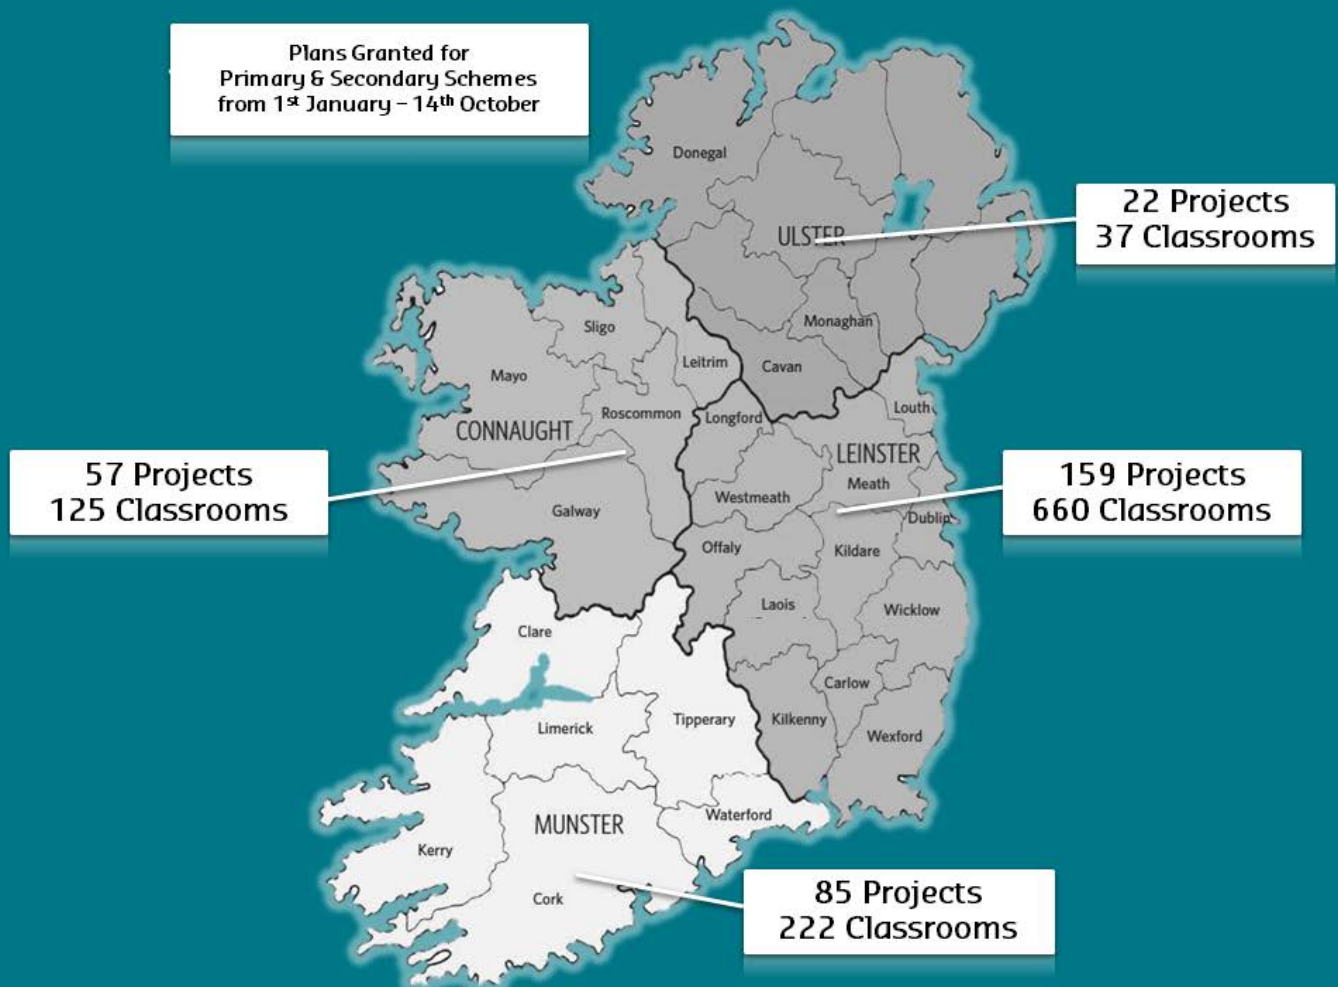

Plans Submitted for Primary & Secondary School Schemes from 1st January - 14th October 2019

<i>Region</i>	<i>Projects</i>	<i>Classrooms</i>
Leinster	151	518

Analysis

Investment in the education pipeline in the Republic of Ireland continues to be evident with the following comparisons made between the period of Jan-Oct 2018 and Jan- Oct 2019. The following projects comprise the creation of much needed new classrooms and the extension and refurbishment to existing primary and secondary school facilities across the country.

In Leinster there has been a 15% increase in the volume of projects being submitted for planning. In Munster there has been a 22% increase in the volume of projects being submitted for planning.

In Connaught there has been a 40% increase in the volume of projects being submitted for planning. In Ulster (ROI) there has been a 14% decrease in the volume of projects being submitted for planning.

In the same time period the Leinster region has seen a 30% increase in the volume of projects which received planning approval from Jan – Oct 2019 compared to the same period in 2018. In Munster there has been a 9% increase in the volume of projects which received planning approval. In Connaught there has been an 32% increase in the volume of projects which received planning approval. However in Ulster (ROI) there has been an 10% decrease in the volume of projects which received planning approval.

Activity on the ground however has seen a minor drop off in the volume of projects and classrooms under construction between the same periods in 2018 and 2019.

In Leinster there has been a 22% decrease in projects commencing on site in the period in 2019 compared to 2018. In Munster there has also been a 22% decrease in projects commencing on site. In the Connaught region there has been a 35% decrease in projects commencing on site in 2019 compared to 2018. In Ulster (ROI) there has been an 32% decrease in projects commencing on site in 2019 compared to 2018.

The volume of classrooms under construction for the Jan – Oct period in 2018 represented a total of 859 classrooms versus 779 classrooms for the time period in 2019.

This year Construction Information Services (CIS) has observed a slight slow down in projects progressing to a pre tender or pre construction stage due to the awaiting of funding approval from the Government. CIS has also observed a rise in the use of vacant buildings as temporary accommodation as these schools wait for departmental approval for their projects to proceed.

With regards to minor refurbishment works in the sector, in 2019 CIS captured a total of 138 tenders which were advertised as part of the Schools Summer Works Initiative, covering minor refurbishment and upgrade works at schools around the country.

PROJECTS

€13.9m School Development, Dunboyne Junior & Senior National School, Station Road, Dunboyne Co. Meath. Project ID: 860767

Expressions of Interest are invited from suitably qualified Main Contractors who wish to be considered for the Dunboyne Junior + Senior NS project.

The development consists of the refurbishment and extension to the existing Dunboyne Junior Primary School Building and the construction of the new Senior School Building.

It also involves the removal of existing prefabricated structures, new road/ footpath and car park arrangement, landscaping and all associated works. This is a phased development as this is a live site. The day to day operation of the school must be maintained at all times by the appointed Main Contractor.
