

# SUPPLIERS REPORT

*July 2021*

---

PREPARED BY  
*Pat McGrath*  
*Scott Delaney*

# INTRODUCTION

Here at Construction Information Services (CIS), our dedicated and experienced research team track and monitor building projects through the various planning and construction stages, from early planning right up to completion, allowing our various customer types target projects at the most opportune time.

What it means is that CIS subscribers can get even closer to the key contacts at exactly the right stage in the project's evolution, so there's time to pitch, nurture the opportunity and let the products do the talking.

In this Suppliers Report we have included analysis and a thorough listing of projects which have completed in the first half of this year and analysis on projects due to complete in the coming 3 months, based on our research teams engagement with our information sources; design teams, main contractors or the applicant themselves, in obtaining accurate construction schedules. This report focuses on all projects outside of the residential and infrastructure sectors.

All projects included and broken down in this report can be accessed with an ROI subscription to [www.cisireland.com](http://www.cisireland.com). If you haven't already subscribed, why not take a no obligation free trial today and view our comprehensive database to target many more opportunities.

Our customer care team are also on hand if you need help setting up saved searches, email alerts etc for these opportunities or require any training for your team or one to one. Contact us here.
